

InteliClean

Intelligent Hygiene Systems

V01.21 TRADE

Australia's most advanced bidet system is finally here.

This is the only fully certified bidet for installation with no additional backflow required. And, it is packed with features previously not available.

The Inteliclean Air 9000 Series has all the standard features, such as: bottom wash, ladies wash, air dryer, enema spray and child function. Advanced features of this bidet include a multi-position, 5-step nozzle adjustment as well as pulse and oscillate settings to provide a much cleaner wash. This bidet is made for ease of use.

Rear wash

Ladies wash

Enema wash

Air dryer

Heated Seat

5 step adjust

Pulse & Oscillate

Deodoriser

You are never perfectly clean with toilet paper.

Remote control

Can be wall mounted or held in hand.

Advanced technology has allowed so many features and functions to be compressed in to a simple slimline design.

Power usage

Economy mode.

With normal use, this bidet will only cost \$12.00 per year for electricity.

That's less than 4 cents per day.

Advanced seat design

180kg weight rating.

Unlike other bidets on the market that only hold up to 120KG.

Lid safety features

A soft close lid that is safe to sit on.

Previously unheard of, this lid is designed to allow a person to sit on the lid without causing damage.

Advanced cleaning

Quick release function.

Can be removed with just the press of a button to allow for cleaning under the bidet.

The bidet can also be operated by buttons on the side.

Designed with the user in mind this machine is virtually unbreakable with its 180KG weight rating and sit on lid. For easy cleaning, just press the quick release button and the bidet will slide straight off.

Child settings

Designed for all ages.

Automatically adjusts when the child button is pressed, reducing pressure and temperature.

Anti-microbial plastic

Repels germs.

The materials used throughout this bidet are highly efficient at protecting against bacteria, fungi, viruses and germs. Acting as a non-toxic health barrier.

MF Filter

2 Stage External Filter.

1. The sediment filter removes particles from the water before it enters the bidet. Protecting your internal heating systems.
2. Water then passes through the ceramic balls, collecting silver ions that attack bacteria, germs and viruses.

EM Ceramics

Final Stage of Purification.

3. The activated ceramics restructure the water molecules providing a superior cleansing action, helping to absorb toxins and impurities as it washes you.

Virus and Germ Removal

3 stage protection system.

The IntelliClean series bidet is the only bidet in Australia to provide a 3 stage protection system. Providing a safer, cleaner and more hygienic wash than any other bidet system on the market.

Warranty

2 year full replacement.

If anything goes wrong with the internal elements of your bidet, it may be replaced free of charge. T&C's apply.
